EDUCATION

Nazarbayev University

Bachelor of Science in Computer Science

Astana, Kazakhstan

Aug. 2024 – Jun. 2028

EXPERIENCE

Full-stack Developer

Oct. 2025 – Present

Esep Home

Astana, Kazakhstan

- Built an **internal CRM** that replaced **amoCRM**, eliminating subscription costs; now being productized as a standalone commercial offering.
- Developed **AI managers** that handle WhatsApp customer requests end to end and automate order processing.
- Automated scheduling and routing, saving **7–9 hours** weekly for the operations team and improving **worker efficiency by 75%**.
- Stabilized and extended a mobile app serving **30,000+ users**: eliminated recurring crashes, reworked core flows, and shipped new features.
- Contributed to a **2× increase in operational revenue** through workflow automation.

Software Developer

Sep. 2025 – Present

ACM@NU Student Chapter

Astana, Kazakhstan

- Shipped **6** production event websites totaling **3,500+** registrations across NU's largest tech events.
- HackNU 2025/26**: NU's annual 24-hour hackathon, **800+** registrations each year.
- Plus **WISH**, **NU Open** (ICPC-style, 10+ countries) and **Women's Hack Day**: **400–500** registrations each.

PROJECTS

InternAI | *Python, FastAPI, TypeScript, React, Gemini API, Tailwind, Zustand, Azure*

[GitHub](#) | [UI Demo](#)

- Built a platform that prepares students for tech internships with personalized **12-week learning plans**; reached **471 active users across 90 countries** with **10-minute** average sessions.
- Designed AI features that analyze user goals to generate weekly tasks, topics, and practice materials.
- Solo-built and operated end to end**: UX, FastAPI backend, React frontend, Azure deployment, and a **Product Hunt** launch.

AldarKose | *Python, FastAPI, React, TypeScript, SDXL, LoRA, OpenAI API*

[GitHub](#) | [UI Demo](#)

- Built an AI storytelling platform that generates **6-frame visual storyboards** of the Kazakh folk hero Aldar Kōse using **GPT-4** scene decomposition and **SDXL** image generation.
- Fine-tuned a **LoRA adapter** (rank=64, 3.7M params) on 70 custom images to achieve **85–90% face consistency** across frames, validated via CLIP scoring.
- Won **1st place** in the **Higgsfield ML** case at **HackNU 2025**.

ACHIEVEMENTS & COMPETITIONS

Hackathons: **4 podium finishes** across ML, data science, and full-stack cases:

- **1st place, Higgsfield ML** case at **HackNU 2025**: **300,000 KZT**. [GitHub](#)
- **2nd place of 150 teams, De-Vibed Hackathon** by Command Center: **300,000 KZT**. [GitHub](#)
- **2nd place, Decentrathon 2026**, inDrive case on legislative entropy. [GitHub](#)
- **3rd place, Terricon Valley**, healthcare platform: **100,000 KZT**. [GitHub](#)

nFactorial Incubator 2025 (Almaty): top **4%** among **3,000+** applicants; 10-week full-stack AI bootcamp covering AI platforms, scalable deployment, and user growth.

LeetCode: solved around **800** problems, over **50%** at medium difficulty.

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, C++.

Backend: NestJS, FastAPI, Celery.

Frontend: React, Next.js, Vite, Tailwind CSS, Zustand, TanStack.

Databases: PostgreSQL, Redis, pgvector.

Cloud & DevOps: AWS, Google Cloud, DigitalOcean, Docker, GitHub Actions, CI/CD, Nginx.

AI: OpenAI SDK, Google ADK, LangGraph, Embeddings, RAG.
